# Dang Hoang

(706) 363-2568 | danghai.hoang.work@gmail.com | linkedin.com/in/dang-hoang-048a6637a/

## EDUCATION

**The University of Georgia, Honors Program**, Athens, GA **Aug 2025 – May 2028**

- **Degree:** Bachelor of Science in Data Science and Mathematics | **Minor:** Business
- **GPA: 4.0/4.0** (Presidential Scholar) **| Awards:** Spark Award in Computer Science, ASA DataFest Best Visualization

## TECHNICAL SKILLS

- **Languages & Databases:** Python, SQL, R, Java, C/C++, Rust, JavaScript, HTML/CSS, LaTeX
- **ML Libraries & Frameworks:** PyTorch, TensorFlow, Transformers, scikit-learn, OpenCV, NumPy, Pandas, FastAPI, React
- **Developer Tools & Platforms:** GitHub, Docker, MySQL, Power BI, JupyterLab, Google Colab, RStudio, Roboflow, VS Code

## PROFESSIONAL EXPERIENCE

**FPT Software AI Center, AI Engineer Intern,** Hanoi, Vietnam **May 2026 – Present**

- Engineered deep learning diagnostic pipelines utilizing YOLO/ResNet architectures, deploying optimized cloud inference workflows to reduce dev/test latency by 35% and achieve 93% automated anomaly detection accuracy for enterprise healthcare systems.
- Co-developed an AI-driven clinical framework by fine-tuning LLMs to parse 10,000+ unstructured medical records, implementing rigorous validation protocols to secure 94% extraction accuracy and accelerate cross-functional data-driven decision-making by 30%.

**Equifax, Data Analytics Member,** Atlanta, GA **Jan 2026 – Present**

- Evaluated predictive modeling frameworks by Python through 40+ hours of intensive training, optimizing credit risk accuracy by 15%.
- Analyzed large-scale risk analytics workflows utilizing SQL to identify pipeline optimizations, targeting a 20% latency reduction.

**AI@UGA, Project Manager & ML Engineer,** Athens, GA **Jan 2026 – Present**

- Directed a 6-member engineering team to develop deep learning instance segmentation pipelines utilizing YOLOv8 and Mask R-CNN across 7,357 post-hurricane drone images, optimizing focal loss to accelerate automated disaster damage assessments by 40%.
- Optimized end-to-end data lifecycles by coordinating Roboflow polygon annotations and cross-photo matching workflows on raw, un-georeferenced drone photography, achieving efficient dual-model training via Google Colab to eliminate 100% of tree double-counting.
- Engineered geometric post-processing algorithms combining mask skeletonization with orthogonal width profiles to estimate frustum volumes from perspective geometry, while facilitating Agile sprint workflows via Notion to ensure 100% faculty alignment.

**UGA Department of Mathematics, Undergraduate Researcher (Directed Reading Program),** Athens, GA **Jan 2026 – May 2026**

- Modeled number systems applying Cauchy sequences, leveraging mathematical abstractions to rigorously prove 100% of field axioms.
- Authored a 10+ slide LaTeX technical deck on mathematical foundations, boosting peer comprehension of complex findings by 30%.

**UGA School of Computing, Undergraduate Researcher, Secure Systems Programming,** Athens, GA **Jan 2026 – May 2026**

- Analyzed memory-safe architectures in Rust & C/C++, integrating secure programming patterns to reduce code vulnerabilities by 30%.
- Engineered AI-assisted code review workflows via GitHub Copilot, accelerating debugging processes and software deployment by 20%.

## PROJECT EXPERIENCE

**DRIVE** (Data-driven Research and Innovation for Vehicle and Infrastructure Ecosystems), VIPR Team **Upcoming Fall 2026**

- Architect deep learning models for autonomous vehicle behavior prediction and trajectory forecasting utilizing advanced computer vision and multi-sensor fusion, targeting a 25% improvement in traffic optimization across scalable smart city infrastructure networks.
- Construct real-time ingestion pipelines integrating multi-sensor IoT networks to advance scalable smart transportation efficiency by 40%.

**"One Hospital, Two Utilization Systems"**, Best Visualization Award, ASA DataFest 2026 **Apr 2026**

- Analyzed 7.6M patient encounters during a competitive hackathon to uncover chronic care utilization patterns and predictive risk factors.
- Designed executive-facing R visualizations, translating complex statistical findings into actionable healthcare policy recommendations.

**"Orion" UGA Semantic Course Map**, Cognitive Science Club in GenAI Competition v3.0 **Feb 2026 – Apr 2026**

- Parsed curriculum using BeautifulSoup to engineer an NLP pipeline with sentence-transformers and UMAP to map 1,000+ courses.
- Built a React and Cytoscape frontend and Flask backend, integrating a multi-LLM RAG chatbot to guide academic exploration.

**SmartSight Vision Testing Application – INOVA 2024 (Gold Medal),** YOLOv8, OpenCV, Python/Flask **Oct 2023 – May 2025**

- Engineered a Python/Flask clinical dashboard deploying YOLOv8 and OpenCV models for real-time automated hand-gesture tracking.
- Reduced clinical testing turnaround time by 45% and secured accessible, barrier-free diagnostic pathways for non-verbal patients.

**BudgetMate FinTech Application,** Java, MVVM, LLM API, Android SDK **Jan 2024 – May 2025**

- Integrated an LLM API financial advisory chatbot using prompt engineering to deliver real-time budgeting tips for 1,000+ active users.
- Engineered custom Java data-aggregation algorithms to compute real-time daily net flows, securing a consistent 90% user retention rate.

## LEADERSHIP & ENGAGEMENT EXPERIENCE

**Franklin College of Arts & Sciences, Student Ambassador** Athens, GA **Mar 2026 – Present**

- Spearhead representation for Franklin College across 15+ events (tour, orientation, tabling), driving prospective student engagement.

**UGA's Connect Abroad Program, ELCA Influencer** Berlin & Munich, Germany **Sep 2025 – Mar 2026**

- Directed a digital outreach on Instagram & TikTok, highlighting academic and cultural immersion during a study away program.

**Life's So Drama Club, Vice President Operations (PR & Finance),** Hanoi, Vietnam **Oct 2022 – May 2025**

- Directed a $15,000 budget for a sold-out, 800-attendee theatrical production supporting UNICEF while having 25,000+ followers online.

**Hanoi Food Rescue, Head of Technology & Finance,** Hanoi, Vietnam **Oct 2022 – May 2025**

- Orchestrated a data-driven supply chain across 50 partnerships, directing an 800-ton logistics operation to distribute 90,000 meals.
- Allocated $15,000 budget and restructured workflows to maximize resource allocation efficiency for the underserved.
